

Project Evaluation Template

Project: Joseph Christopher Priyanto - Bullet Journal

Reviewer: Yizhou Wang

Code/Repo Smells

- ☒ Does the code seem organized and readable?
 - ☒ Good indentation, meaningful naming, good amount of commenting, etc.
- ☒ How simple (or complex) is the architecture?
 - ☒ Repo navigable, files organized meaningfully, etc.
- ☒ Is there a CI/CD pipeline in place?
 - ☒ Are there automated tests in place?
- ☒ Is there proper documentation?
 - ☒ Code: Class diagrams, API descriptions, etc.
 - ☒ Repo: Onboarding documents, pipeline instructions, roadmaps, high-level diagrams, ADRs, etc.

Score (1-5): 4.5

Comments:

Lack of descriptions in pull requests.

No roadmap.

Application Quality

- ☒ Is the app easy to set up and run?
- ☒ Was there a design process?
 - ☒ System design, site architecture, UX research, needfinding, wireframing, lowfi & hifi.
- ☒ Can it be stood up easily?
 - ☒ Is there a working demo showcasing functionality?
- ☒ Does the app seem functional? Does it work as expected?
 - ☐ Working buttons, options, features
- ☒ Does it seem polished?
 - ☒ Intuitive to use? Complicated and unfriendly?
 - ☐ Responsive? Janky?
 - ☒ Bugs everywhere?
 - ☒ Pleasing UI? Hard to look at?
 - ☒ Accessibility options?

Score (1-5): 4

Comments:

The sidebar buttons, except the language settings, don't work. (but mentioned in "Features That Were Planned But Did Not Implement" in the feature list)

The date got wrong - I selected March 19, 2022 (Mon) in the sidebar, but the main page shows 4/19, Monday. [p.s. 4/19/2022 is a Tuesday.]

After I typed the text, the "click to tune" button is in the text.

4/19, Monday

Self Considerations

- ☐ What tools and frameworks are used? Are they difficult to pick up?
- ☒ At a glance:
 - ☒ Would this project be fun to work on?
 - ☒ How much more could we improve this project?
- ☐ Do we have team members familiar with specific tools/dependencies used?

Score (1-5, will be discounted by 50%): 5

Comments:

We can supplement those features shown in the sidebar.
