

Project Evaluation Template

Project: Pomodoro Timer (Edgar)

Reviewer: Joseph Christopher Priyanto

Code/Repo Smells

- ☒ Does the code seem organized and readable?
 - ☒ Good indentation, meaningful naming, good amount of commenting, etc.
- ☒ How simple (or complex) is the architecture?
 - ☒ Repo navigable, files organized meaningfully, etc.
- ☒ Is there a CI/CD pipeline in place?
 - ☒ Are there automated tests in place?
- ☒ Is there proper documentation?
 - ☒ Code: Class diagrams, API descriptions, etc.
 - ☒ Repo: Onboarding documents, pipeline instructions, roadmaps, high level diagrams, ADRs, etc.

Score (1-5): 5

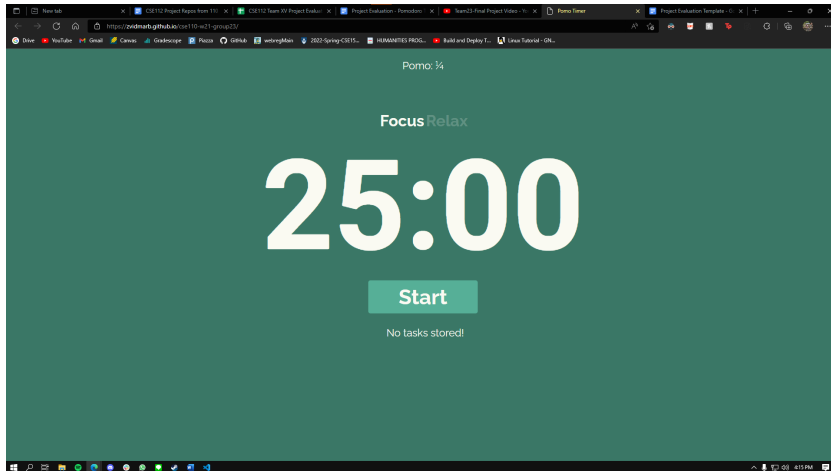

Comments: In my opinion it checks everything!

Application Quality

- ☐ Is the app easy to set up and run?
- ☒ Was there a design process?
 - ☒ System design, site architecture, UX research, needfinding, wireframing, lowfi & hifi.
- ☐ Can it be stood up easily?
 - ☐ Is there a working demo showcasing functionality?
- ☐ Does the app seem functional? Does it work as expected?
 - ☐ Working buttons, options, features
- ☐ Does it seem polished?
 - ☒ Intuitive to use? Complicated and unfriendly?
 - ☐ Responsive? Janky?
 - ☐ Bugs everywhere?
 - ☒ Pleasing UI? Hard to look at?
 - ☐ Accessibility options?

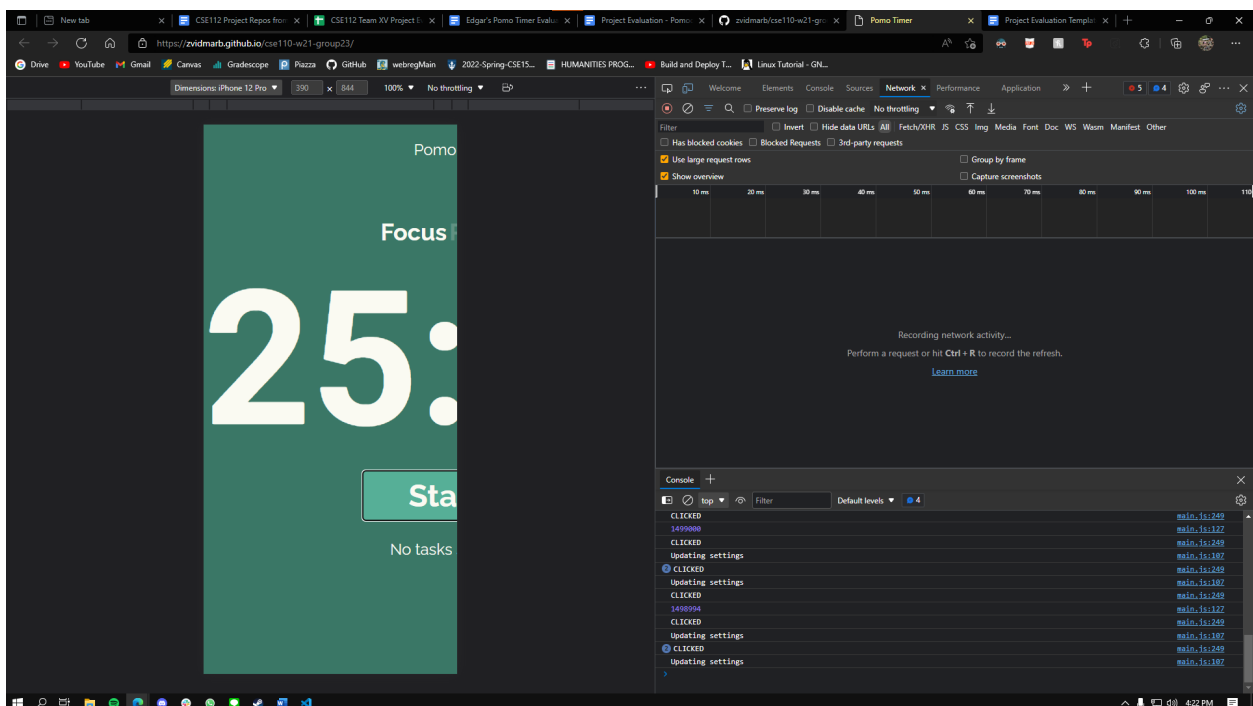

Score (1-5): 2

Comments: Definitely room for improvement, the gear on the top right as shown in the video demo is not showing up in the demo, so can't really test anything further.

However, UI is clean and intuitive.

Assuming it was meant for mobile devices, it did not scale properly, making the page unusable.

Self Considerations

- ☒ What tools and frameworks are used? Are they difficult to pick up?
- ☐ At a glance:
 - ☒ Would this project be fun to work on?
 - ☒ How much more could we improve this project?
- ☐ Do we have team members familiar with specific tools/dependencies used?

Score (1-5, will be discounted by 50%): 5

Comments: I believe given the simple idea, it has a lot of potential for improvement and functionality. The nice documentation and roadmap makes easy for navigating through the repo.
