Score (1-5): [5](#)

Comments:

- Working demo [here](#)
- Wireframe, lofi and hifi diagrams are all there!
- Everything is functional and works well.
- Very polished except for a few minor things.
- Works on multiple devices

Self Considerations

- ☒ ~~What tools and frameworks are used? Are they difficult to pick up?~~
- ☒ ~~At a glance:~~
 - ☒ ~~Would this project be fun to work on?~~
 - ☒ ~~How much more could we improve this project?~~
- ☒ ~~Do we have team members familiar with specific tools/dependencies used?~~

Score (1-5, will be discounted by 50%): [4](#)

Comments:

- Echoing what Nick K said, the project is pretty much done but there is always room to improve and expand but we might need to put some thought into what that might look like.
- Pretty standard web dev frameworks and tools.

Other Comments

- ~60 minute evaluation
- Potential but not immediately obvious
- Final score: $4 + 5 + 4(0.5) = 11$
