

Frenemy Review by Team 5

05/26/2022

Zoom meeting, 8-9pm

End User Feedback (Evan Puzon)

- Contrast: color would be blended
 - accessibility: contrast between background and foreground
- Reason for drop-down settings?
- Tongue twister: “distraction description”
- Distraction report: not pretty willing to report
 - change name
- “END POMO” instead of “END DAY”
- Right side of tasklist: Triple dot icon instead of 6 dots (which usually means moving)
 - depending on the system
- Maybe tasklist in another place for less distraction
 - Focus mode: just the timer at the center
 - Is the timer too big?
- Cramped between heading & timer
- pomo session input: default value? let users know they can change?
- timer goes faster when clicking the timer button for many times in a short time
- 2-3 px enough for border radius

Peer Developer Feedback (Ethan Wadsworth)

- inline script tags in html?
- importing module files: 1 for the main module is enough for UI
- dialog tags
- double import
- Settings.js: changing one by one for dark mode?
 - use css class: .darkmode
