Code/Repo Smells

- ☑ ~~Does the code seem organized and readable?~~
  - ☑ ~~Good indentation, meaningful naming, good amount of commenting, etc.~~
- ☐ How simple (or complex) is the architecture?
  - ☐ Repo navigable, files organized meaningfully, etc.
- ☑ ~~Is there a CI/CD pipeline in place?~~
  - ☑ ~~Are there automated tests in place?~~
- ☐ Is there proper documentation?
  - ☐ Code: Class diagrams, API descriptions, etc.
  - ☐ Repo: Onboarding documents, pipeline instructions, roadmaps, high level diagrams, ADRs, etc.

Score (1-5): 2
Comments: Code comments are pretty good, but there's some seriously lacking stuff. It feels like a lot of things were being worked on and they just had to stop.

Application Quality

- ☐ Is the app easy to set up and run?
- ☐ Was there a design process?
  - ☐ System design, site architecture, UX research, needfinding, wireframing, lowfi & hifi.
- ☐ Can it be stood up easily?
  - ☐ Is there a working demo showcasing functionality?
- ☐ Does the app seem functional? Does it work as expected?
  - ☐ Working buttons, options, features
- ☐ Does it seem polished?
  - ☐ Intuitive to use? Complicated and unfriendly?
  - ☐ Responsive? Janky?
  - ☐ Bugs everywhere?
  - ☐ Pleasing UI? Hard to look at?
  - ☐ Accessibility options?

Score (1-5): 3
Comments: UI feels like it needs some work. There's odd little bugs like how fractions are long repeating decimals. There's a lot of inconsistencies, but the website is fast and responsive. Also, the core functionality does seem to work.

Self Considerations

- ☐ What tools and frameworks are used? Are they difficult to pick up?
- ☐ At a glance:
  - ☐ Would this project be fun to work on?

    ☐ How much more could we improve this project?

   ☐ Do we have team members familiar with specific tools/dependencies used?

Score (1-5, will be discounted by 50%): 2
Comments: I think there's a lot of room for improvement, especially in terms of documentation and UI. We could do this one, but it's not my preferred. I do like there's no extra frameworks, afaik.
