- Good API descriptions!

Score (1-5): **3**
Comments:
- Working demo is live here
- Everything seems functional
- Wireframes are present (lofi) but there are no system design diagrams

- Pretty intuitive and has a couple of responsive elements, doesn't seem buggy. UI could use some improvements, works on different devices.

Self Considerations
- ☑ ~~What tools and frameworks are used? Are they difficult to pick up?~~
- ☑ ~~At a glance:~~
  - ☑ ~~Would this project be fun to work on?~~
  - ☑ ~~How much more could we improve this project?~~
- ☑ ~~Do we have team members familiar with specific tools/dependencies used?~~

Score (1-5, will be discounted by 50%): **5**
Comments:
- I think that this project has some room for improvement. Seems to be a good base to work on.
- Pretty standard framework that everyone will be able to pick up if they aren't familiar.
- Should be fun from a tech side, especially if we have a passion for bread?

Other Comments
- ~60 minute evaluation
- Definite potential
- Final score: 4 + 3 + 5(0.5) = 9.5
