Project Evaluation Template

Project: Bullet Journal (Mathew)
Reviewer: Nick Krolikowski

Code/Repo Smells

- [x] ~~Does the code seem organized and readable?~~
    - [x] ~~Good indentation, meaningful naming, good amount of commenting, etc.~~
- [x] ~~How simple (or complex) is the architecture?~~
    - [ ] Repo navigable, files organized meaningfully, etc.
- [x] ~~Is there a CI/CD pipeline in place?~~
    - [ ] Are there automated tests in place?
- [x] ~~Is there proper documentation?~~
    - [ ] Code: Class diagrams, API descriptions, etc. **NO**
    - [x] ~~Repo: Onboarding documents, pipeline instructions, roadmaps, high level diagrams, ADRs, etc.~~ **Minimal documentation, did have onboarding**

Score (1-5): 4
Comments: Documentation was a bit hard to find but almost all of it was there.

Application Quality

- [ ] Is the app easy to set up and run? **No, had a difficult time understanding how to use it.**
- [ ] Was there a design process? **NO**
    - [ ] System design, site architecture, UX research, needfinding, wireframing, lowfi & hifi.
- [x] ~~Can it be stood up easily?~~
    - [x] ~~Is there a working demo showcasing functionality?~~
- [ ] Does the app seem functional? Does it work as expected?
    - [ ] Working buttons, options, features
- [ ] Does it seem polished?
    - [ ] Intuitive to use? Complicated and unfriendly?
    - [ ] Responsive? Janky?
    - [x] ~~Bugs everywhere?~~
    - [ ] Pleasing UI? Hard to look at?
    - [ ] Accessibility options?

Score (1-5): 1
Comments: extremely hard to use and understand, wish there was a tutorial of some sort. Buttons randomly wouldn't work at times.

Self Considerations

- [ ] What tools and frameworks are used? Are they difficult to pick up?
- [ ] At a glance:
    - [ ] Would this project be fun to work on?
    - [ ] How much more could we improve this project?
- [ ] Do we have team members familiar with specific tools/dependencies used?

Score (1-5, will be discounted by 50%): 4
Comments: One good thing is that they used zero dependencies in the project, which would make it easy to pick up the project. This project is definitely a bit of a fixer upper, but that could make the end result that much better. We could greatly improve the performance, simplicity, and accessibility of the app.

Other Comments
This app requires restructuring both on the organizational and code levels. Lot of work but could be worth it.
